

Cover Letter

Dear Hiring Manager,

I am writing to express my interest in engineering internship opportunities with your company. I am currently pursuing a B.S. in Computer Engineering at The University of Texas at Dallas, where I have developed a strong foundation in programming, embedded systems, circuit analysis, computer architecture, and hardware-software integration. I am looking for an opportunity where I can apply my technical knowledge in a professional environment while continuing to grow as an engineer.

Through my coursework and personal projects, I have gained experience with C++, Python, Java, MATLAB, ORCAD PCB, Arduino, circuit prototyping, and object-oriented programming. One of my projects involved developing a light-controlled instrument using an Arduino Uno, photoresistor, switches, and buzzers, where I processed real-time analog inputs and implemented different system behaviors through C/C++ logic. This experience strengthened my skills in troubleshooting, testing, hardware-software integration, and problem solving.

In addition to my technical background, I have developed strong communication and teamwork skills through my previous work experience. At Micro Center, I worked directly with customers to understand their technical needs, troubleshoot issues, and recommend appropriate technology based on their goals and budget. As a Teach/Tech Lead at iCode, I taught programming and robotics concepts and guided students through hands-on projects and debugging. These experiences taught me how to communicate technical information clearly, adapt quickly, and work effectively with people from different backgrounds.

I would bring a strong willingness to learn, technical curiosity, and a hands-on approach to problem solving. I am eager to contribute to meaningful engineering projects while expanding my experience in design, development, testing, and collaboration within a professional engineering team.

Thank you for your time and consideration. I would welcome the opportunity to discuss how my background and experience could contribute to your team.

Sincerely,

Smridhi Subedi
