

Smridhi Subedi

Plano, TX | smridhisubedi@yahoo.com | (832) 941-8522 | [linkedin.com/in/smridhi-subedi-8a55b8218](https://www.linkedin.com/in/smridhi-subedi-8a55b8218) | github.com/smirsr

SKILLS

Embedded/Hardware: Arduino Uno, Circuit Prototyping, Tinkercad Circuits, ORCAD PCB, MATLAB

Languages: C++, Python, Java, JavaScript, TypeScript, HTML, CSS, Assembly (MIPS/MARS)

Tools: Git, VS Code, SolidWorks, Figma, Eclipse

EXPERIENCE

Sales Associate

July 2024 – October 2024

Micro Center

- Advised customers on PCs, 3D printers, accessories, and troubleshooting; matched recommendations to individual budget and use-case.

Website Developer

June 2024 – August 2024

Aspire2STEAM

- Improved front-end UX and accessibility on a WordPress site for a women-in-STEM initiative using HTML, CSS, and JavaScript.

Teach/Tech Lead

March 2023 – July 2024

iCode

- Taught Python, Java, HTML, and robotics fundamentals to classes of up to 20 students; guided hands-on projects and debugging sessions.
- Developed lesson materials and mini projects to reinforce OOP, loops, functions, and core engineering concepts.

PROJECTS

Light-Controlled Instrument

Arduino Uno, C/C++, Tinkercad

- Built a sensor-driven instrument using a photoresistor (LDR), slide switches, and 4 buzzers; implemented 4 distinct sound modes triggered by light level thresholds and switch states.
- Converted real-time analog readings into pitch and tempo outputs; used switch-gated and threshold-based logic to control mode selection across the full range of sensor input.

WEhack 2025: GrowYourTime

<https://github.com/WEHACK-GROWYOURTIME/GrowYourTime>

TypeScript, Figma

- Built a Tamagotchi-style task and time management game at a hackathon; designed the UI in Figma and implemented a functional prototype.
- Developed using TypeScript with a focus on encouraging users to build productive habits through interactive gameplay.

2D Adventure Game

Java

- Built a Java 2D adventure RPG game, applying OOP principles and data structures to implement structured gameplay logic and custom features.

EDUCATION

University of Texas at Dallas

B.S. Computer Engineering. Academic Excellence Scholarship.

Summer/Fall 2027

Relevant Coursework: Embedded Design, Computer Architecture, Data Structures and Algorithms, Operating Systems
